```

## Permissions and App Review

<https://developers.facebook.com/docs/pages/access-tokens>

For apps in [live mode](#), all Page-related permissions except for [pages\\_show\\_list](#) require approval through the [app review](#) process.

Apps in [development mode](#) are allowed to use all Page-related permissions without app review. However, content published while an app is in development mode will be hidden from the public until the app is switched to Live mode.
